PROFESSIONAL SUMMARY

Versatile and seasoned software engineer with a rich and diverse skill set spanning over 9 years, specializing in HTML5, CSS, Tailwind CSS, React, Angular, MongoDB, Express, and Node.js. Proven track record as a Solidity blockchain developer, crypto enthusiast, and NFT creator using Remix IDE and Cranq. I am the visionary behind Chirpsky, a groundbreaking Full Stack Social Media app designed to champion constitutional rights, decentralization, and blockchain freedom. With a passion for creativity and innovation, I've successfully crafted multiple NFT collections and developed ChirpskyKite.net, a secure private messaging app. My expertise lies in delivering process improvements and innovative solutions that enhance efficiency, elevate customer satisfaction, and elevate company standards. Committed to bringing cutting-edge technology to the forefront and dedicated to pushing the boundaries of what's possible in the digital landscape.

- Smart Contracts 'Solidity Blockchain Developer'
- NFT && Cryptocurrency / Token creation
- Best Practices and Standards

EDUCATION

DeVry University
Online Campus • 01/2010

BBA: Business Administration

WORK HISTORY

100DEVS - Software Engineer
New York, NY • 03/2020 - 01/2023

- **Collaborative Problem-Solving**: I collaborated closely with cross-functional teams, including designers, product managers, and quality assurance, to identify requirements, troubleshoot issues, and deliver solutions that exceeded client expectations.
- **Full-Stack Development**: I played a key role in developing end-to-end solutions for various clients, working with technologies such as Python, JavaScript, and PHP. This involved creating intuitive user interfaces, building scalable backend systems, and integrating third-party APIs.
- **Agile Development**: I was an advocate for agile methodologies, contributing to daily stand-up meetings, sprint planning, and ensuring the team's adherence to best practices for project management. This approach allowed us to consistently deliver high-quality software on time and within budget.

BrandedBook - Software Engineer
New York, NY • 08/2016 - 02/2020

- **Front-End Development**: I specialized in creating engaging and responsive user interfaces, ensuring a seamless user experience across various devices and browsers. HTML5, CSS3, and JavaScript were my primary tools, and I paid close attention to detail to achieve pixel-perfect designs.
- **E-Commerce Solutions**: I had the privilege of developing and maintaining e-commerce websites, integrating secure payment gateways, managing product catalogs, and optimizing the checkout

process to improve conversion rates.

- **Web Performance Optimization**: Performance was a top priority. I implemented various techniques like image optimization, lazy loading, and browser caching to ensure fast load times and optimal page speed, resulting in improved SEO and user satisfaction.
